

# The hidden work of accountants

How business advisors and accountants keep the country running.

Beyond accounts and tax returns,  
accountants provide **consultative  
support** to clients working in  
all corners of the economy.

**Here are just a few >>>**

# Healthcare

It is key that GP practices build-up as much **financial resilience** as possible by thinking like a **commercial business**-and having someone to guide them through that process is invaluable.

# Charity

Charities have a responsibility to manage their finances effectively. They are also subject to **specific financial regulations**, often requiring help from accountants.

# Farming

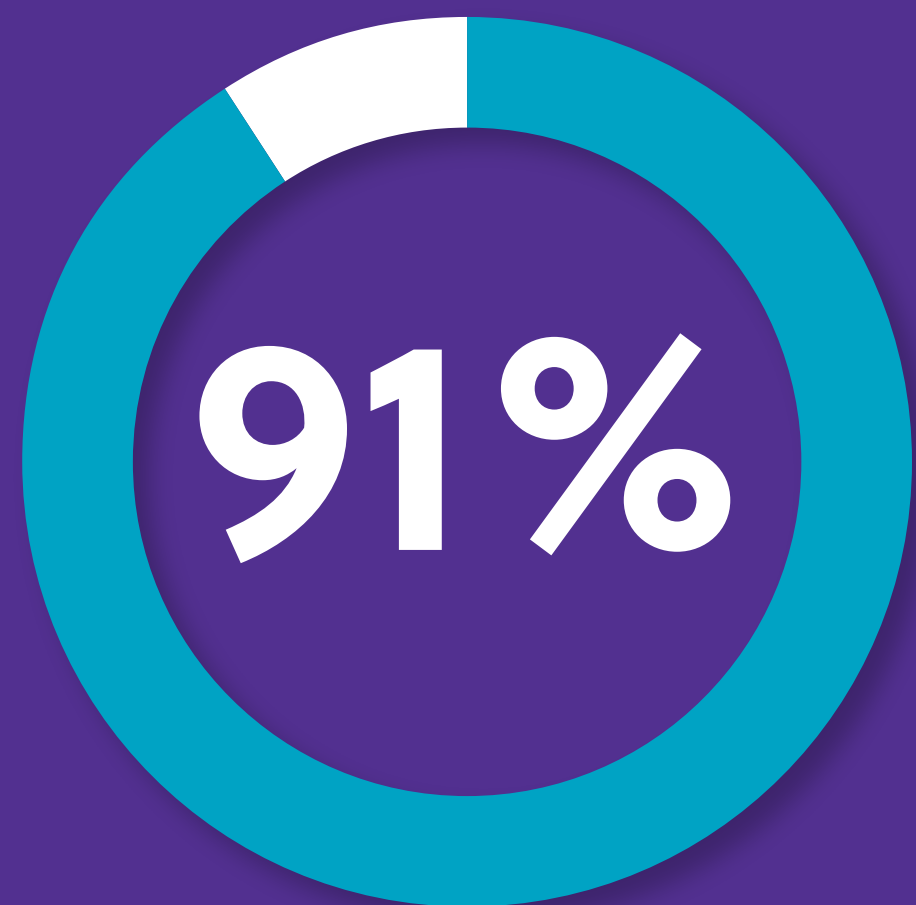

Much of our team's work centres on helping farming families to **navigate legislation changes.**

Because the agricultural industry is so contingent on weather cycles and seasons, **planning ahead is vital.**

# Self-employed workers and small businesses

Recent research\*  
showed that 91% of  
small businesses rated  
accountants as an  
important part of their  
business' operations.

*\*sage.com, New research shows perception lags reality as UK accountants underestimate the positive impact they have on the nation's small and midsize businesses (SMBs)*

Business finances can be complex, time consuming, and stressful. We can help by providing vital advice and support, **get in touch today.**
