

The top 5 Accountancy Apps for SMEs

1 Dext Prepare

Users can snap a picture of an invoice or receipt and Dext will pick out the information and feed it into an accountancy software.

The image displays the Dext Prepare mobile application interface. The main screen shows a list of expenses with columns for Status, User, Date, Supplier, Category, Total, Tax, and Match. The list includes items like 'Halfords', 'Starbucks', 'Amazon', 'Sainsbury's', 'Canon', 'Ikea', 'Staples', and 'John Lewis'. A sidebar on the left contains navigation options like 'Dashboard', 'Cost', 'Inbox', 'In processing', 'To review', 'Ready', 'Archive', 'Sales', 'Expense Reports', 'Bank', 'Suppliers', 'Customers', and 'Collapse'. A smartphone in the foreground shows a receipt from 'The Anchor Inn' with a total of £50.55 and a list of items including 'Bottlegreen', 'Roast beef', 'Roast pork', 'Crème brulee', 'Ice cream', and 'Double Espresso'. The app interface also features a top navigation bar with 'Add Documents', 'Notifications', 'Resources', and 'Log Out' options.

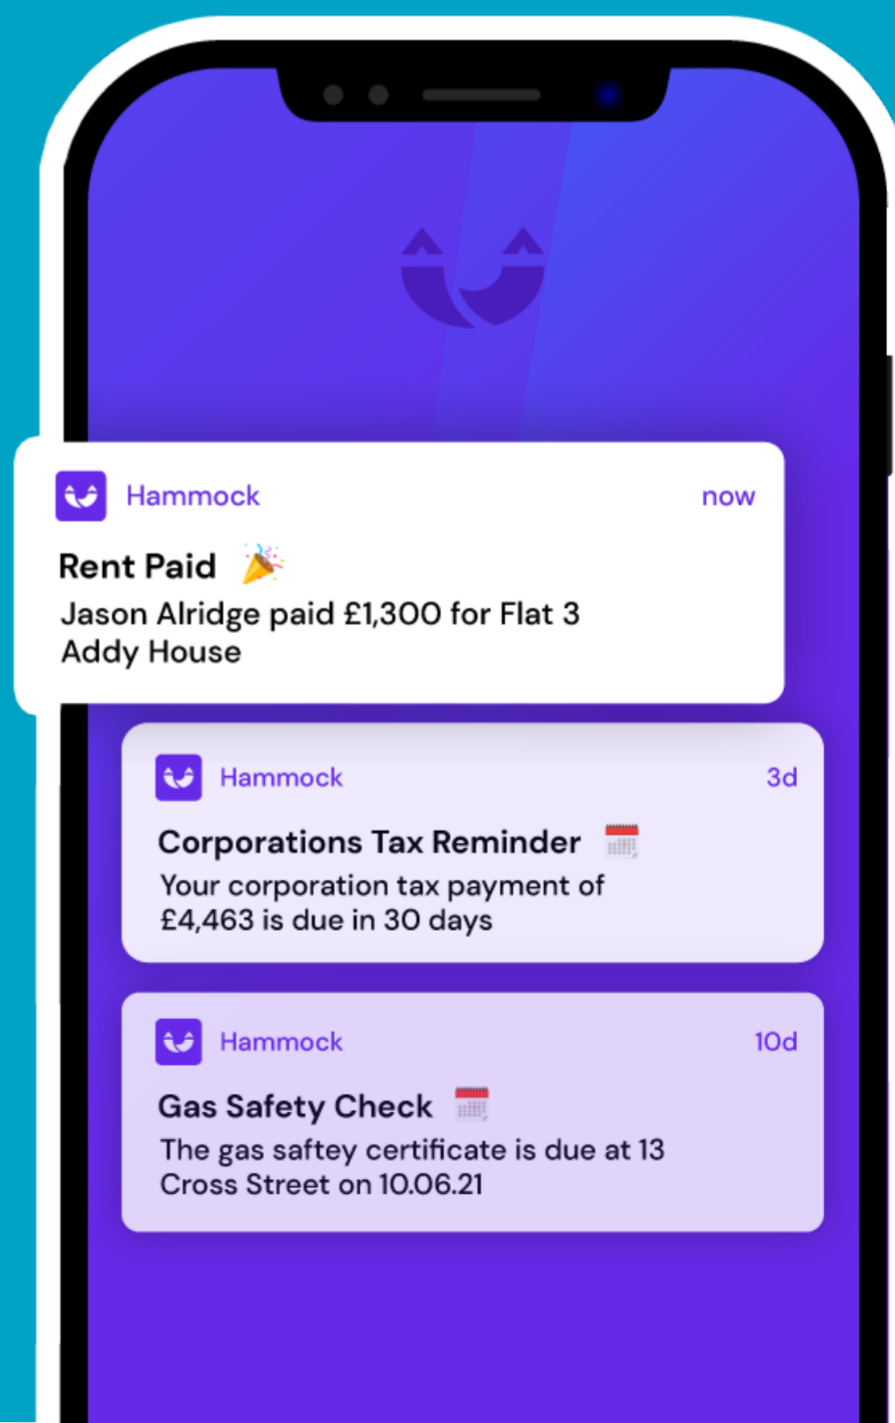

Status	User	Date	Supplier	Category	Total	Tax	Match
